

## **Claims**

We claim:

1. A new type aircraft, includes airframe (1), wing (2), characterized in that  
5 the transverse section of airframe (1) has an oblate (oval) profile with corrugated  
area (1-1) on the ventral of airframe (1).
2. A new type aircraft according to Claim 1, characterized in that there are  
uneven friction areas (2-1) on the underside surface of wing (2).
3. A new type aircraft according to Claim 1, characterized in that there are  
10 fireproof & anti-wear layers (3) on the ventral envelopes of airframe (1).
4. A new type aircraft according to Claim 2, characterized in that there are  
fireproof & anti-wear layers (3) on the friction areas (2-1).
5. A new type aircraft according to Claim 3, characterized in that the said  
fireproof & anti-wear layers (3) have tire rubber material.
- 15 6. A new type aircraft according to Claim 4, characterized in that the said  
fireproof & anti-wear layers (3) have tire rubber material.
